

MORPHING I

You have seen what can be done on computers when it comes to changing images—pictures of cats morphed to mice, or young faces changed to old faces. We can also morph words, and, just like changing images, it is done in a number of steps.

JUST REMEMBER

1. You may change only one letter at a time.
2. You may not change the order of the letters.
3. Each change should give a word that can be found in a dictionary.

Here is a way to change “boy” into “man”

BOY	change the O to A
BAY	change B to M
MAY	change Y to N
MAN	

That was easy. See whether you can change the following animals:

PIG

COW

DOG

CAT

APE

HEN

HIM

SHE
